

# Natural Wood Beauty

*We use the finest quality cedar to create a truly natural and beautiful spa cabinet.*

### *Superior Craftsmanship by Skilled Woodworkers*

Each shipment of tongue-in-groove cedar is inspected by our craftsmen before precision cutting and assembly of the cabinet begins.

### *Protection from the Elements*

Each cabinet is finished with a clear high quality penetrating stain to increase moisture protection and shield against UV rays.

*A high quality BEHR stain is the finishing touch that ensures each spa's long lasting beauty.*

### *Solid Wood Foundation*

Every spa is constructed with a moisture resistant, pressure treated, solid wood base. This foundation repels water and provides you with a maintenance free flooring that will last for years.

*Beautiful  
& Natural*

*Experience the difference...*
